

MAUJ BILINGUALISM

In 2004 the Ministry of National Education established the National Bilingual Program. "The policies of bilingualism are based on three big props: language, communication and culture, since the linguistic learning in a cultural learning " (MEN, 2004).

We develop strategies and actions tending to strengthen and inspire a bilingual environment into action in the frame of the strategy of the MEN of the National Bilingual Program to form competent students in a foreign language from pre-school and implement it gradually to higher grades. We guarantee the joint of our MAUJ School in the bilingual project with the policies and strategies issued by the Catholic University that follows the Common European Framework. We generate playful environments of learning that motivate the students the learning of a foreign language.

National Bilingualism

We study five subjects in English

Sciences

ART

PHYSICAL EDUCATION

MUSIC

TECHNOLOGY AND COMPUTERS STUDIES
